Infos	<p>A high level workshop on "Ethical and Policy Implications of Global Mobility and Security" will be held in the framework of the (Rising Pan-European and International Awareness of Bio Security Ethics, <a href="http://www.riseproject.eu">www.riseproject.eu</a>). RISE is a "track 2" in funded by the European Commission in the scope of FP7 S Society, which aims to provide an open, international, forum on ethical, privacy and social issue raised by biometrics and security technologies. RISE is a aims to complement bilateral and regional forums sponsored at governmental level. In particular the workshop aims to, to deepen, enlarge, and ensure continuity to international forums already initiated by the international conferences on ethics of biometrics organised by the EC DG Research and the US DOD Office respectively in Brussels and Washington DC in 2005.</p> <p>The main focus of the workshop will be the multifaceted problem of fundamental rights, privacy and security in relation to the implementation of biometrics, body scanners and other security technologies. During the workshop a Policy Report on "Whose Security? Imaging Technology in European Airports: the Ethical and Social Context" will be presented.</p>
