Data protection in the spotlight in India at a meeting taking place in New Delhi.

The next 24 and 25 September will be held in India a meeting on the protection of personal data.

Organised by the Data Security Council of India (DSCI), the meeting will focus on commonalities and differences between the European Union and India regarding these vital policy issues. The overall goal is to promote and foster debate between India and Europe on security, data protection and privacy.

The event is supported by the EU-funded RISE ('Rising pan-European and international awareness of biometrics and security ethics') project.
